

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
A New Leaf, Inc.	\$ 500,000.00	A New Leaf proposes to enhance the health, safety, and experience for clients by improving ACCESS TO CARE through new and upgraded technology equipment and transportation services for the agency's AHCCCS-eligible programs which include Outpatient Behavioral Health and Integrated Clinics in Mesa and Glendale, Parents and Children Teaming Together (PACTT) serving families in the community, valley-wide, and the East Valley After-School Program, located in Mesa. These equipment upgrades will automate check-in and allow for an enhanced telehealth experience. Security cameras will be installed for additional security measures at each site. A New Leaf's Behavioral Health After School Program services are provided at A New Leaf's Mesa campus, plus three of the Mesa Title I elementary schools. To improve access to care and remove barriers to this program, A New Leaf will create a dynamic, engaging, interactive telehealth group experience through new modern technology. Additionally, as part of the efforts to reduce barriers to care and increase access to medically necessary services, transportation services will be added to increase unique clients served in program annually.
Adam's House	\$ 89,677.81	Our project is to integrate our residents regularly into the community and explore surrounding areas and activities. We are in need of a accessible small bus that can accommodate all residents and staff at one time. We need a vehicle that has a lift or ramp for a resident in a wheelchair, possibly 2, and comfortable seating for the other residents so they can all benefit in community outings.
Adult Day Care Services, Inc. dba The Susan J. Rheem Adult Day Center	\$ 173,114.46	While enrolled participants of SJRC have enhanced indoor spaces for numerous life enrichment programming. The current design of the SJRC outdoor space is limited to a safe and secure covered patio primarily for sitting outside. SJRC is fortunate to have an approximate undeveloped one-acre parcel of land adjacent to this patio. It has been a goal of SJRC to be able to open and expand this enclosed patio to offer a safe and secure ADA accessible strolling therapeutic garden with a portion of this land.
AIRES LLC	\$ 430,000.00	AIRES is hoping to acquire 5 Ford Transit 350s, with AbiliTrax Flooring and Sure Lock wheelchair securement system. These vehicles will be assigned to 5 of AIRES Day Treatment Programs throughout different geographical areas of the state. If awarded, this would allow AIRES to enhance the community engagement of the 126 individuals who are currently receiving our Day Treatment services. In addition, the 5 new vehicles will open the possibility of 15 new members to receive Transportation and Day Treatment Services.
AJ's Safe Place Residential Facility Incorporated	\$ 192,000.00	Our agency is committed to expanding Home and Community Based Services for underserved communities, by opening a day program particularly for elderly adults and children with developmental disabilities. Funding will be utilized for classroom, sensory equipment and supplies, technology and teaching supplies. Additionally funds will be used to purchase a 12 passenger van and 1 wheelchair accessible van.
Ambiance Assisted Living	\$ 293,500.00	Our New chances (Complete Health Activities Nutrition Community Exercise Socialization) program is designed to optimize the assisted living experience. We are enhancing our home to engage residents to receive the highest physical, mental, social, and nutritional services available! Our project will include upgrading the backyard to be an activity area for residents, community, and families for physical activities, social interaction, recreation, exercise, and outdoor entertainment. Additionally, our project will include upgrading the media center to allow residents to explore options for online school and job training opportunities and a wheelchair accessible van will provide proper transportation to allow residents to visit senior centers, churches, stores, and other requested locations.
Arcadia Assisted Care	\$ 85,700.00	Arcadia Assisted Care seeks to provide a new physical and social rehabilitation program for our residents and the community with a pickleball court.
Arches Behavioral Health Center	\$ 126,200.00	ABHC is looking to enhance their current infrastructure pertaining directly to transportation and access to care. Providing transportation is key to member participation and commitment to the program as it ensures attendance and can elevate the stressors of "getting to program" such as a financial cost of cabs, bus, or taxis, reduces the waiting period in harmful weather situations, increases engagement when members get to transport together, increases the likelihood of attendance when a familiar face (BHT) is able to pick up. Allowing the purchase of more vehicles will allow our center to reach out to more clientele as we often run into a van capacity issue as we cannot always make 2 trips and ensure clients are at group on time.
Arizona Consumer Direct Personal Care LLC	\$ 209,672.00	CDCN will provide enhanced on-site (home) enrollments of new clients and quarterly visits to existing clients by increasing the number of AWD (All Wheel Drive) vehicles available and electronically automating the paperwork/documentation process with the use of portable Chromebooks equipped with mobile hotspots and subscriptions to DocuSign. The electronic paperwork will enhance efficiency, ease-of-access, and time commitments on the client's end during enrollments and quarterly visits. The new AWD vehicle portion of this project will also allow our Service Coordinators to easily visit the homes of our clients, in even the most remote/rural areas, and the advanced technology portion will aide in immediately recording and signing the necessary documentation for instant upload to our system.

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
Arizona Developmental Services	\$ 313,820.00	We are looking to expand our current employment program of ADS Subs & Salads from a ghost kitchen to the currently vacant warehouse attached to the building our organization owns. Funding from the ARP program will allow us to move forward with renovating the warehouse space with the needed plumbing, electrical, commercial kitchen equipment, decor, and seating. The cafe and community space will encourage community members to create relationships with each other through social events, co-working space, and delicious food!
Arizona Training & Evaluation Center, Inc. (AZTEC)	\$ 176,494.00	AZTEC decided on an infrastructure project specifically focused on upgrading accessibility to/within the home and modifying existing bathroom spaces. Specifically, this infrastructure project is intended to upgrade three existing (3) partially barrier free bathroom spaces and modify three (3) additional bathroom spaces to create six (6) completely barrier free bathroom spaces in six (6) separate group homes (plants). Additionally, each of these locations will be fitted with updated ramping at specific entry and exit points to increase accessibility and usability across all living spaces within the home.
Asociacion Mutua de Orientacion y Rehabilitacion (Project AMOR)	\$ 108,300.00	Project AMOR would like to increase their member capacity and to do this Project AMOR would need to make changes to their existing space which is very convenient for families and members. Changes would include but not be limited to upgrading play areas with equipment, such as fencing and shade/canopies, adding a splash pad, additional restrooms and a shower area, upgrading the plumbing and sewer system to accommodate additional restrooms and an splash pad, change out the HVAC unit to accommodate more members, making minor repairs to the roof, upgrading electrical panels, along with some remodeling inside to accommodate separate areas for members to have access to.
Avant Recovery	\$ 243,837.00	The project being expanded to effectively serve more members is our Comprehensive Community Peer Support Program. The first step is providing transportation to increase member experience, participation, and engagement. Providing program-based transportation by trusted peers increases program participation rates and the likelihood of attending healthcare appointments before and after our services. The next step is to provide secure telehealth rooms to help members schedule and participate in additional healthcare appointments while at our facilities. The final step is to customize and integrate the Credible EHR to streamline our current manual workflow and improve our member data outcomes and reporting.
Avista Senior Living Historic Downtown Mesa	\$ 337,000.00	In order to make significant, direct impacts on member experience, health, and safety, I propose three milestones for our infrastructure project. To install a fire safety/suppression sprinkler system to the building, purchase a new bus for resident transport, and landscape a gravel area that currently houses a dumpster into a shaded seating area and garden for resident use.
Botanical Protection LLC DBA Botanical Wellness Center	\$ 259,900.00	We will be acquiring transportation vehicles to transport clients between the facilities and our outpatient center. Vehicles will also be used to take clients to doctor appointments, family visits, social services, and culture events amongst other things.
Caring Hearts Home Care Services LLC	\$ 181,659.00	Our goal is to create a sustainable health and safety program that benefits families in Arizona and serves as a model for other organizations across the State. Our new Sentry ESH Program will aim to provide family members who are not paid care providers with the knowledge and skills they need to improve the safety and health of their loved ones with developmental disabilities. By offering completely free certification training and free programs for non paid parents and family members our objective is to raise awareness in the community and help minimize risks and ensure that our clients receive the best care possible.
Casa Grande Assisted Living Home	\$ 214,500.00	This project is entirely categorized as an infrastructure project due to the nature of it being a new program with a new vehicle that would be implemented into the daily operations for Casa Grande Assisted Living. This will ultimately introduce a new means of not only transportation but also a new means of entertainment for its residents. Lake Havasu City is full of incredible attractions such as the London bridge, multiple city parks, and beautiful areas to visit and take in the beauty with the desert and the Colorado river. This is also a programmatic project because it would allow for improvements to daily activities by adding variety to them. There is a supplemental element to Casa Grande acquiring this van because it would also aid in the disbursement of residents from the facility in case there would be an emergent need to evacuate. Although Casa Grande and its staff is always in compliance with emergency evacuation, it is the opinion of the residents and the families that having this van would add a layer of comfort during such emergency. Casa grande has received immense support via these plans if it is awarded such grant and such passenger van.
CDT Kids	\$ 174,620.00	The ARP Grant funding award will be used for our new "Kind Games" Project and related infrastructure needs. "Kind Games" is an adaptive sports program at CDT Kids the Barn Academy in Queen Creek, Arizona.

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
Child Crisis Arizona	\$ 500,000.00	Child Crisis Arizona respectfully requests funding for the Counseling Center as a core and necessary service component within the health and wellness service hub of our new Center for Child and Family Wellness. Support from the Arizona Health Care Cost Containment (AHCCCS) ARP Program will create an inviting, safe, and therapeutic space for children and youth to heal from their adverse childhood experiences (ACEs) and move forward healthfully as we aim to break the cycle of generational abuse and neglect. Once building construction at the Center for Child and Family Wellness is complete, the funding from the AHCCCS ARP Program Award will be used to enhance member experience in the new Counseling Center such as audio/visual and furniture for several behavioral health therapy and sensory rooms. To further improve service delivery, the funding will be used for infrastructure needs such as new computer equipment, an E-signature service, and electric vehicles and charging stations for programmatic use.
City of Peoria	\$ 32,200.00	The project would be to increase offerings for nutritional education through purchasing a structured nutrition curriculum to help learn about health food options and how to make healthy food choices. Additionally a purchase of a smoothie bike would allow a fun way to teach members about healthy food options while powering a blender thru peddling a bike. This bike could be used within our DTA, DTS, DTT programs but also be used by our GSE members to make smoothies for the public and be sold through the food cart. Another focus would be to increase the members cooking skills through the purchase of a mirrored demonstration table which would allow members to easy see cooking demonstrations and allow for easier access to learn skills then at a countertop in smaller kitchen spaces. This table would have multi purpose by also being used as an art demonstration table. Finally, the purchase of a new convection oven in the kitchen that is used to prepare product for our GSE program. This oven would be counter height and allow for easier access by members by having duel doors that prevent members from bending and working around a tradition oven.
Clover Fields Assisted Living	\$ 315,524.06	In partnership with Nevvon and PocketRN, Clover Fields aims to provide comprehensive support for Medicaid home care clients, enhancing health outcomes, client/provider experiences, and healthcare system value. PocketRN's telehealth nursing boosts client access to professional guidance, ensuring care continuity and improved health outcomes. Nurses are trusted experts in delivering daily education, coaching, and at-home care support. Clients and families can meet with the same nurse regularly, building relationships to foster behavior change. PocketRN is validated to create behavior change and promote client care engagement. Clients and caregivers can access immediate RN care via PocketRN, offering peace of mind in managing healthcare needs. PocketRN's care model includes proactive RN visits, improving care plan compliance and care continuity. Nevvon's e-training platform equips clients and family caregivers with knowledge and skills for effective care management, resulting in better health outcomes and positive client experiences. Family caregivers access customized training, enhancing their support capabilities.
Cornerstone Healing Center	\$ 500,000.00	We are currently in the process of opening our second outpatient treatment center that focuses on helping the lower income and Medicaid population. The new facility is located in Maryvale Village, West Phoenix, where there is a need for community support and mental health resources. It is a peer and community support program that assists to achieve long term sobriety, reintegration into the community, maintain employment, and promote healthy lifestyles. It provides access to nutrition counseling and physical fitness activities, volunteer work, recovering coaching, support groups, and relationship building. In order to accomplish this expansion, we are in need of infrastructure-based items such as vehicles, technology, furnishings, and fitness equipment.
Crossing Paths	\$ 57,000.00	We would like to buy a new (or gently used) Toyota Sienna to transport our individuals. This would allow them to have an additional vehicle to get to where they want to be when they want to and increase community engagement, while allowing them to live a fuller life with varying experiences outside of the group home. Additionally, this vehicle will service individuals with respite and attendant care while our individuals are scheduled to be at their daytime program.

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
Cypress Staffing Services, LLC	\$ 419,210.06	In partnership with Nevvon and PocketRN, Cypress aims to provide comprehensive support for Medicaid home care clients, enhancing health outcomes, client/provider experiences, and healthcare system value. PocketRN's telehealth nursing boosts client access to professional guidance, ensuring care continuity and improved health outcomes. Nurses are trusted experts in delivering daily education, coaching, and at-home care support. Clients and families can meet with the same nurse regularly, building relationships to foster behavior change. PocketRN is validated to create behavior change and promote client care engagement. Clients and caregivers can access immediate RN care via PocketRN, offering peace of mind in managing healthcare needs. PocketRN's care model includes proactive RN visits, improving care plan compliance and care continuity. Nevvon's e-training platform equips clients and family caregivers with knowledge and skills for effective care management, resulting in better health outcomes and positive client experiences. Family caregivers access customized training, enhancing their support capabilities.
Devereux Advanced Behavioral Health Arizona	\$ 125,000.00	Funding will support the expansion of Devereux's community-based Integrated Child and Family Services programs, including Meet Me Where I Am (MMWIA)/Behavior Coaching and Transition Age Youth (TAY) program. We will purchase vehicles to increase transportation capacity, as well as offering increasing the number and type of community activities we are able to offer. By purchasing two passenger vans (one for Maricopa County and one for Pima County), we can eliminate this significant barrier to service. Available transportation will also allow us to offer an increased number of community integration activities. These activities include, but are not limited to, shopping, restaurants, recreation, banking, volunteer work, festivals, community support services, and more.
Elite Assisted Living	\$ 146,000.00	Our New chances (Complete Health Activities Nutrition Community Exercise Socialization) program is designed to optimize the assisted living experience. We are enhancing our home to engage residents to receive the highest physical, mental, social, and nutritional services available! Our project will include upgrading the backyard to be an activity area for residents, community, and families for physical activities, social interaction, recreation, exercise, and outdoor entertainment. Additionally, our project will include upgrading the media center to allow residents to explore options for online school and job training opportunities.
Elite Assisted Living 3	\$ 343,502.00	Our New chances (Complete Health Activities Nutrition Community Exercise Socialization) program is designed to optimize the assisted living experience. We are enhancing our home to engage residents to receive the highest physical, mental, social, and nutritional services available! Our project will include upgrading the backyard to be an activity area for residents, community, and families for physical activities, social interaction, recreation, exercise, and outdoor entertainment. Additionally, our project will include upgrading the media center to allow residents to explore options for online school and job training opportunities and a wheelchair accessible van will provide proper transportation to allow residents to visit senior centers, churches, stores, and other requested locations.
Everlasting Community Services	\$ 499,999.97	Everlasting Community Services proposes to provide a day program expansion project aimed at enhancing our residents' health and safety while strengthening their experience as they become part of our family. We will create a safe, accessible, pleasant space with the following activities: digging, planting, watering, and harvesting food. The residents will benefit by eating fresh garden vegetables and herbs that they themselves have grown. We will offer nutrition classes where residents and guests can come for cooking demonstrations, taste food, assist with meal prepping, and get useful information to make better nutritional choices.
Focus Employment Services, LLC.	\$ 499,800.00	Focus is partnered with AZStRUT to impact 1,700 AHCCCS members with an opportunity to join the digital community through our collaborative project, Tech LifeSkills. Access to technology increases opportunities for education and training, employment, and community participation. The factors that contribute to digital equity, or bridge the digital divide, include access to affordable devices, internet, digital literacy training, and technical support. (Http://diversity.social/digital-equity/). Each participant in our program receives a Tech LifeSkills Package which includes the following: 1. Chromebook, 2. Tech LifeSkills Lab (orientation curriculum on Digital Literacy Skills), 3. Toolkit (reference manual on lab topics and resources), 4. Certificate of Completion, 4. Tech LifeSkills Membership (one year of ongoing digital learning).
Friendship Retirement Corporation	\$ 265,959.95	Sarah's Place provides assisted living specifically designed for those with mild or moderate dementia. With this funding, we are looking to expand the two kitchens by adding steam tables to keep meals warm for serving, expand the dining area, add a hydration station and have a demonstration kitchen area for therapeutic cooking classes.
Handmaker Jewish Services for the Aging	\$ 500,000.00	Assisted Living Facility renovation including structural updates to flooring, fire doors, call light and camera systems, and elevator mechanics will ensure optimal safety measures are in place to protect all residents. Updates to the kitchen and dining areas in the Assisted Living space will expand opportunities for social engagement and relationship building, as well as improving the overall dining experience. An updated transportation van would increase engagement in an already robust community activities program which includes our "Out and About Program" and "Adventure Bus Program."

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
HERITAGE AT CAREFREE	\$ 499,820.00	This award will increase ALTCS bed capacity by 34 beds. The capacity approved by AZ DHS is 104 beds. Heritage is the only ALTCS licensed facility in 20 miles. Heritage has the building infrastructure, but needs to reconfigure some areas to allow for greater bed capacity, more storage of resident assistive devices, opportunities for recreation and socialization, and improvement in a more independent lifestyle.
Heritage Lane Behavioral Assisted Living	\$ 260,970.00	The project is titled "Resident Safety and Security First: Protection from Unwanted Access and Active Shooter". The project name is descriptive of both the initiative and its objective. The project will involve the hardware installation and software implementation of 88 high quality commercial-grade motion detecting security cameras, 18 magnetic access security doors and 2 video intercom systems. The goal of the system is to protect against unwanted intrusion and active shooter risk, a growing and increasing threat to licensed communities like Heritage Lane.
Home Away From Home Behavior	\$ 160,000.00	Our agency is committed to expanding Home and Community Based Services for underserved communities, by opening a day program particularly for elderly adults and children with developmental disabilities. Funding will be utilized for audiovisual, auditory, aural, neural, neurological, and olfactory supplies, technology equipment. Additionally, funds will be used to purchase wheelchair accessible vans and a 15 passenger van.
Hushabye Nursery	\$ 499,400.00	This project involves the purchase of and improvements to equipment, connectivity access, data systems, and physical plant modifications that will directly impact member experience, health and safety through an upgraded phone system and EMR platform (KIPU), 24 hour/7 days a week internal and external security monitoring, and larger workspace area to house increased telehealth staff.
KBM Holdings LLC	\$ 254,700.00	We plan to expand our day program by leasing the suite next door which will include physical plant modifications and furnishings. With this increased capacity, programs such as physical education, nutrition instruction and music therapy will be added. Computers will be purchased, and members will be taught the basics on how to access and browse the internet, save files or be able to have access to the internet if they don't have it at home. We also seek to create an outdoor area with shade, misters and tables where the members at the DTA can go outside to relax, unwind, or engage in outdoor activities. Vehicles will be purchased for the group home as well as the DTA so that members may go out into the community safely and comfortably. Purchasing the vehicles will also allow us to transport members to our DTA who do not have a mode of transportation. Furniture will be purchased for all group homes so that members have a sense of pride in their home and belonging by being able to go out and pick out new furniture for their homes, to include new sofas, dining table, bedroom furniture.
KIDS INDIVIDUAL DEVELOPMENT SERVICES AZ, LLC	\$ 500,000.00	KIDS AZ will be contracting with The Direct Support Career Academy (DSCA), which is dedicated to developing an online learning platform specifically tailored for parents and care providers. This platform aims to equip them with the necessary advocacy and resource identification skills.
Kids Outreach Kids LLC	\$ 185,650.00	KOK would like to enhance current group home group travels that will have a vehicle with toileting facilities so that our members who do not go to the restroom alone when out in the community can have a place to go to the restroom during outings and trips. Plus, we would like to go digital and turn all forms into readable documents, convert old forms into readable documents for fast efficient services.
Kivel Manor Assisted Living Center	\$ 209,000.00	The main purpose of the project is to provide WIFI availability and internet connectivity, and its related opportunities, to all residents. Interconnectivity will be done by installing a WIFI system in all our buildings, an on all floors, in order to provide access to all residents. In addition, we will be adding a sufficient number of IPADS in order to give access to residents that do not have their own equipment. We will also be creating a central computer center in order for residents to have computer access and be able to socialize with others, as well as do their own outreach and research. We believe the ability to use telehealth will be a major benefit to our elderly residents who may be physically frail or do not have the resources to go to a doctors office to have symptoms checked or ask a basic question. We will be creating community social programs so residents can socialize while using IPADS. In addition, we will be creating a training program to assist those who needs orientation to IPADS and computers, as well as teaching residents how to use email and to connect to social media sites.
LOU Corporation	\$ 499,156.98	LOU Corporation's project involves a building addition with new bathrooms including two additional toilets accessible for our Members, more classroom/activity space for our Members and a paved, asphalt lot with a designated outdoor recreational area.
Marian Adult Care Home	\$ 92,353.00	The Abraham project will enable a better opportunity for community engagement, volunteer opportunities and skills development by providing technology and infrastructure that equips residents to communicate online, commute and stimulate physical and mental wellbeing. Project Abraham will purchase equipment such as laptops and tablets for enhancement classes and for telemedicine; an accessible vehicle for transportation to volunteer locations and community programs and adoption of an emotional support animal.

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
Milemarkers Therapy Inc	\$ 308,983.10	Our habilitation services are for members ages 3 through aging adult and are offered in Lake Havasu City, Bullhead City, Kingman, and other outlying communities in Mohave County. Our habilitation services promote social engagement and relationship building as well as health and wellness through recreational activities. We want to expand and enhance these current service offerings and combat the limited resources, intense summer heat, and limited transportation. Supporting this funding request will increase Milemarkers service delivery capacity by 20% in a rural area with limited providers and waitlists. This funding request is for infrastructure improvements that will increase our transportation capacity, enhance our environmental and physical locations to promote member health and safety, and technology improvements to increase connectivity and maintaining compliance with Electronic Visit Verification.
N'dee Home Care, LLC	\$ 470,983.00	The Project will enable N'dee Homecare to expand our scope of services to the elderly and disabled in our service area to begin providing non-emergency medical transportation involving wheelchair and stretcher transportation, for personal errands for our clients, as well as providing transportation for groups of our clients to elder-appropriate exercise classes offered by the Tribe's Ndee Fitness Center and to Elder Fest events across the state, as a way to help our clients stay active and socially engaged.
Next Step Southwest LLC	\$ 41,648.00	Next Step Southwest requests a grant to improve member experience by expanding opportunities for social engagement with peers, enhancing our data collection system through reliable technology, and making safety improvements to our clinical space. To expand opportunities for social engagement and relationship building, we want to purchase additional furniture and materials to facilitate peer play in our clinic. We will purchase additional tables, chairs, and shelves to organize toys and materials in each clinic room to create a more welcoming environment for collaboration between therapists and clients. We will also purchase mobile shelving units and materials to set up four stations in our main clinic area to encourage spontaneous peer play daily. To
Paradise Cove, Inc.	\$ 308,871.06	In partnership with Nevvon and PocketRN, Paradise Cove aims to provide comprehensive support for Medicaid home care clients, enhancing health outcomes, client/provider experiences, and healthcare system value. PocketRN's telehealth nursing boosts client access to professional guidance, ensuring care continuity and improved health outcomes. Nurses are trusted experts in delivering daily education, coaching, and at-home care support. Clients and families can meet with the same nurse regularly, building relationships to foster behavior change. PocketRN is validated to create behavior change and promote client care engagement. Clients and caregivers can access immediate RN care via PocketRN, offering peace of mind in managing healthcare needs. PocketRN's care model includes proactive RN visits, improving care plan compliance and care continuity. Nevvon's e-training platform equips clients and family caregivers with knowledge and skills for effective care management, resulting in better health outcomes and positive client experiences. Family caregivers access customized training, enhancing their support capabilities.
Pinal-Gila Council for Senior Citizens	\$ 146,077.60	Pinal-Gila Council for Senior Citizens (PGCSC) requests \$146,077.60 in funding to purchase two (2) Meals on Wheels delivery vans. The cargo-style meal delivery vans will be utilized to transport meals to senior centers in Pinal County, and to the homes of seniors participating in the Meals on Wheels program. One of the two delivery vans will be retrofitted with a refrigeration system that will allow meals to remain cold at a constant temperature for longer periods of time.
Quality Connections	\$ 149,948.14	Our Diversifying Quality Connections Community Work Crews Project is a hybrid Programmatic/Infrastructure project that will improve quality of life for adults aged 18 and older living with intellectual and developmental disabilities in Flagstaff (Coconino County), by helping them progress towards greater independence. This will be achieved through building the capacity of existing Group-Supported Employment Program including increasing work site options from nine employer partners to 15 and acquiring two new 10-passenger vans.
Roman Home LLC	\$ 27,047.00	At Roman Home members are encouraged to build healthy mental, emotional, and physical habits. An environment that also encourages those healthy habits is important and the grant would allow Roman Home to improve the members' physical environment by enhancing the members' backyard. Our vision is to create a space where members can exhibit and practice their coping skills, implement healthy habits through exercise and also be hands-on in their nutrition through a vegetable garden.
SERENITY TENDER CARE SERVICES LLC	\$ 200,310.00	Our proposed project is to install a playground and a greenhouse along with other infrastructure enhancements including computer systems and a van.
Smiles for Special Needs	\$ 182,220.00	Smiles projects will support individuals with developmental delays in learning primary computer and IT skills, emphasizing future career development. We would also like to offer an art immersion program that allows individuals to express themselves in a way that has been traditionally out of their reach due to their different abilities and social or economic constraints.

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
Southern Arizona Association for the Visually Impaired (SAAVI)	\$ 275,875.00	Saavi respectfully requests funding to provide Accessibility Upgrades for the Tucson Training Center for the Blind. This will allow us to modify our new building in Tucson and to accommodate the accessibility needs of our students and staff while providing additional security for clients when they are on the property. This building provides additional space for Saavi to provide training for youth and adults, including a braille library, computer labs, and dedicated kitchens for living skills. While the extra space allows us to expand our programming, aspects of the building remain inaccessible for people who are blind. With funding we will relocate the lobby from the second floor to the first floor and widen the door to the main entrance and install a sliding door to make it wheelchair accessible. We will also install a new, updated elevator car as our current elevator lacks braille to indicate floor levels and the door sensors are not equipped to detect canes or other assistive devices. There are twenty-four exterior doors to the outside. To ensure the safety of the building and our clients, funding will allow Saavi to purchase and install electronic locks controlled by an app accessible to people who are blind, automatic accessible door openers for the exterior courtyard doors, accessible electronic door locks, two automatic drive-through gates and four call boxes for the property.
Southwestern University and Global College, Inc	\$ 239,500.00	For our project, we want to improve our current fleet of two, aging 15-passenger vans by replacing with with a fleet of 3 different types of vehicles in order to improve the condition, safety, and diversity of our current fleet.
St. Luke's Home	\$ 300,061.00	In 2022, St. Luke's launched a capital campaign and subsequent renovations to increase the sustainability, safety, and accessibility within the home. To date, facility upgrades have included new windows, energy efficient lighting, and new irrigation in the community garden. This grant will continue the renovations to include new carpeting and vinyl tile flooring (LVT flooring) in common areas of the property and in individual units. Additionally, this proposal will fund fire safe door installations, which helps to keep all residents safe in the case of an emergency in the building. These renovations will help to ensure resident safety and accessibility throughout the home.
The Centers for Habilitation/TCH	\$ 500,000.00	TCH is requesting funds to expand our transportation services. Specifically, we will utilize the grant funds to update our fleet with diverse vehicles to meet the changing needs of our supported individuals and replace aging vehicles. By way of illustration, utilizing smaller vehicles, i.e. minivans with a lift, for individual or small group activities. Transportation is critical for our supported individuals to fully participate in all aspects of life.
The Purposeful Mind, LLC	\$ 301,450.00	The Healing Box 13 week Trauma project is an enhancement to our program. This program aids individuals in various steps of the trauma recovery process, which helps to minimize distractions and enhances their ability to engage in other services. The results we are hoping to gain from the program are to remove barriers to receiving therapeutic services, establishing a support system through therapy, and building a healthy lifestyle.
Therapy Builders, LLC	\$ 299,941.00	Our project's goal is to expand Therapy Builders' capacity to help individuals with disabilities participate in various outdoor events that Arizona Adaptive Water Sports (AAWS) currently holds, and at which Therapy Builders volunteers and the members we service participate at. Arizona Adaptive Water Sports serves people with cognitive challenges (ages 3 and up) by giving them, as well as their families, friends, and caregivers, recreational opportunities on Arizona's lakes for fishing, tubing, waterskiing, wakeboarding, and surfing. To accomplish this goal, we seek to purchase a used Nautique G23 boat to provide more access to water activities for individuals with disabilities.
Tucson Residence Foundation	\$ 95,180.00	This project will improve Tucson Residence Foundation's infrastructure by adding a 2023/2024 Ford Transit that will be customized to support up to three wheelchairs complete with a mechanical lift.
United Cerebral Palsy of Central Arizona	\$ 250,000.00	UCP seeks to enhance this current day program by adding additional choices to the members' day-to-day activity list that specifically target physical health, wellness, outdoor recreation, and nutrition. This project requires minor upgrades to the facility's outdoor recreation area as well as the purchase of items that will enable members to grow and cook their own healthy food.
Unleashed Phoenix Corp.	\$ 500,000.00	This project aims to address the transportation challenges faced by marginalized communities in addiction recovery by acquiring vehicles to expand transportation services. The acquisition of vehicles will play a pivotal role in breaking down the barrier of limited transportation faced by marginalized communities. Dedicated vehicles can be strategically deployed to optimize routes, schedules, and capacity, ensuring timely and reliable transportation services. This increased efficiency reduces wait times, eliminates transportation-related delays, and enhances the overall effectiveness of the recovery support system.

Note: Project descriptions have been summarized from individual applications to provide a high level overview of the intended use of the funding. Applications were evaluated on the totality of the information provided in the application

Organization Name	Amount Awarded	Project Description
Via Elegante Assisted Living and Memory Care	\$ 463,518.75	Our project aims to enhance resident safety and wellness by installing commercial-grade fall detection monitors in each room and bathroom across our communities. These monitors integrate seamlessly into our existing and proposed nurse call systems, instantaneously alerting caregivers in the event of a fall or if a resident is unable to rise independently. Moreover, these advanced monitors provide insightful data on resident movement, enabling early detection of clinical changes, such as Urinary Tract Infections (UTIs), by tracking the number of visits to the bathroom.
Western Arizona Council of Governments (WACOG)	\$ 375,000.00	WACOG AAA seeks to expand our Senior Nutrition Program by increasing access to our services, focusing on the areas that are underserved and rural, with older adults age 60+ and persons with disabilities having the greatest economic and social needs. Through purchase of vehicles to transport people to the Congregate Nutrition Sites, and food to homebound Seniors, the communities of La Paz County, Mohave County, City of Somerton and Wellton and Yuma County will expand and enhance health through nutrition, social and community engagement, and the capacity of our Senior Nutrition Providers.
